CY9C St Paul Island – update by team leader Dan WA4DAN

Our number one goal is to work every station that calls CY9C. We are just in day three in the DXpedition so there will be eight more days of our operations. We just completed our antenna system. We have a great take-off angle at 108 feet above the water. We have three antennas on the top of the lighthouse which is 55-feet tall, so effectively over 160 feet above the water. Let me assure everyone that we are working as hard as we can to work as many stations in ALL areas of the world. Please keep calling and we will get you in the CY9C log! You guys make these DXpeditions possible and we hope it is fun for everyone.

603T Somalia –update August 28

603T team announce that all antennas are now packed, including a 7-element beam for 6m. They also say they are finalising the last details, and the correct setup of the 5 stations that will be on air during the dxpedition, which includes SSB, CW and FT8. Meanwhile, regarding SuperFox mode they say:

'Having carefully weighed up the pros and cons of using SuperFox mode, while recognising that if developed, it could become a high standard, at the moment we feel it is still too young. It is for this reason that we will use the MHSV software during DXpedition.'

3D2Z Rotuma –update

We are pleased to announce that our good friends at Elecraft are a major sponsor of the 3D2Z Rotuma DxPedition scheduled for November 2024. Elecraft has now joined DX Engineering, and the Northern California DX Foundation (NCDXF) as a "Premier" sponsor supporting this unique DXpedition.

This DXpedition is a partnership with Youth on the Air (YOTA) encouraging youth participation and will feature 3 young operators who will be active from 3D2Z on the Island while there will also be 60 or more hams operating 3D2Z remotely using W6IZT's NexGenRiBs over Starlink. Elecraft co-founders Eric Swartz, WA6HHQ, and Wayne Burdick, N6KR, have once again demonstrated their commitment to DXpeditioning and support of youth involvement in our hobby. The K4 provided by Elecraft has been incorporated into a NexGenRiB and will showcase the K4s remote capabilities. We are extremely thankful for the support from Elecraft.

KH0/KC0W –update August 25

'KH0/KC0W and KH0W surpassed 100,000 QSOs a few days ago. Thanks to all the DXers & contesters helping me achieve this. Although KH0 is not "rare" one would think otherwise listening to the European CW pileups. I'm not a great CW operator but I try my best.

I will be departing KH0 permanently in the next few months. This will leave KH0 without any serious amateur operator(s). There are still PLENTY of stations to work if anyone is interested in coming to KH0 for some DXing. I have no doubt that a serious DXpedition team of 3 or 4 guys could put 60,000+ QSOs in the log. The demand is there. Rather than the recent multitude of DXpeditions to American Samoa, a serious team should come to the Mariana Islands.

LoTW users (I'm not one) will love you for it..Another 6 kg of QSL cards will be mailed in September if anyone is waiting on a card.

Again, thanks for the 100,000+ QSOs. If I didn't work a 40 hour per week job who knows how many QSOs would be in the log by now?

Hope to work you from some more interesting places in the near future!!'

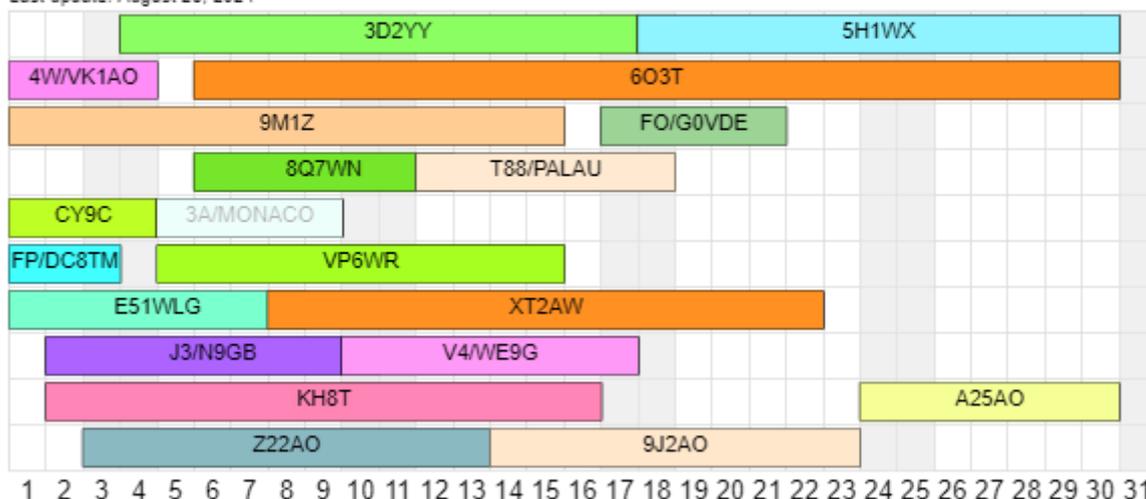

VU4X Andaman Islands –update

The entire team is working hard to prepare for the Andaman Islands DX-pedition 2025. A new website is part of this new DXpedition. We also received the first donations. Many thanks for that. All donations >20 Euro automatically receive a "Thank you award" in their mailbox. A .jpg file that you can use on social media and also in PDF in high resolution for the people who like to print it. Soon more news..

Many thanks to all the stations whose generous contributions made this 6m EME DXpedition to such a rare location possible! Complete information is on my website:
