DX NEWS

African tour by HA5AO –update

Pista, HA5AO provides a short update saying that he hopes conditions improve in the days ahead. At the moment he says propagation does not favour CW – even if signals are strong the QSB and distortion of the signal make it impossible to copy. In addition, the electricity is very unstable with frequent blackouts lasting some minutes to hours.

Future plans with ON6TT and SM7PKK

Seasoned DXpeditioners from yesteryear, Peter ON6TT and Mats SM7PKK plan on sailing and DXpeditioning for the next few years to come. They say they might not have been active a lot in the past years, but now have solid plans ahead in the spirit of YASME, tracing back steps of Danny Weil. They will cross the Atlantic (in January 2025) where Mats may sign **SM8Z/MM** occasionally as they sail. Once in the Caribbean, first stop is J3 – Grenada.

3Y0K Bouvet Island 2026 DXpedition –update

This is a challenging project logistic-wise where vessel and helicopter must be coordinated, and the contracts placed sufficient time ahead. We have studied various offers for boat and helicopter services, in line with the scope of this project.

Due to the postponement from 2025 to 2026 we also had to renegotiate the terms. We are now in the final stage of negotiating the vessel and helicopter contracts for the 3Y0K Bouvet Island DXpedition anticipated for 2026.

We have agreed on the important price elements in these contracts, and will release more info once we have all details completed.

For now we aim to fully finance this trip upfront. This is a major DXpedition where we also team up with a small private group to share the cost and risk for this DXpedition.

In addition the funding of this trip significantly depends on us building a team of 20 operators to finance the budget. We're 14 operators and are actively looking for another 6 operators to complete the team. As we are approaching the final stage of the negotiations we are again reaching out to anyone who wants to join our team to participate in this one in a lifetime adventure.

We estimate to stay around the island for 21 days and the total duration should be around 40 days. Should you wish to join our team please contact admin@3y0.no or Cezar VE3LYC directly. For Peter I, we are still looking for another 3 operators before the team is complete.

3D22 and 3D2V Rotuma –update September 18

Next Monday (Sept 24) or Tuesday (Sept 25) the Rebel DX Group will leave for Rotuma. The sailing takes about 48 hours. Currently, there's some bad weather around Rotuma with 4.5m high seas and 30kts wind so they are watching carefully before departing. Estimated QRV around end of next week.

3D2Y Rotuma 2024 –update

Gregg W6IZT reports that fundraising continues for the upcoming 3D2Y DXpedition to Rotuma Island. "With continued support from our sponsors and donors we are on target to meet our funding goals, but we still have a way to go."

The shipment of most of our equipment has arrived in Fiji, cleared Customs, and is in storage awaiting transfer to the boat that will take our gear to Rotuma. To minimize the cost of air freight the team is carrying 2 x Elecraft K3s and 3 x KPA500s. Baggage constraints on the flight to Rotuma are strictly enforced, limiting what we can carry with us.

The DXpedition runs from November 15th to December 4th.

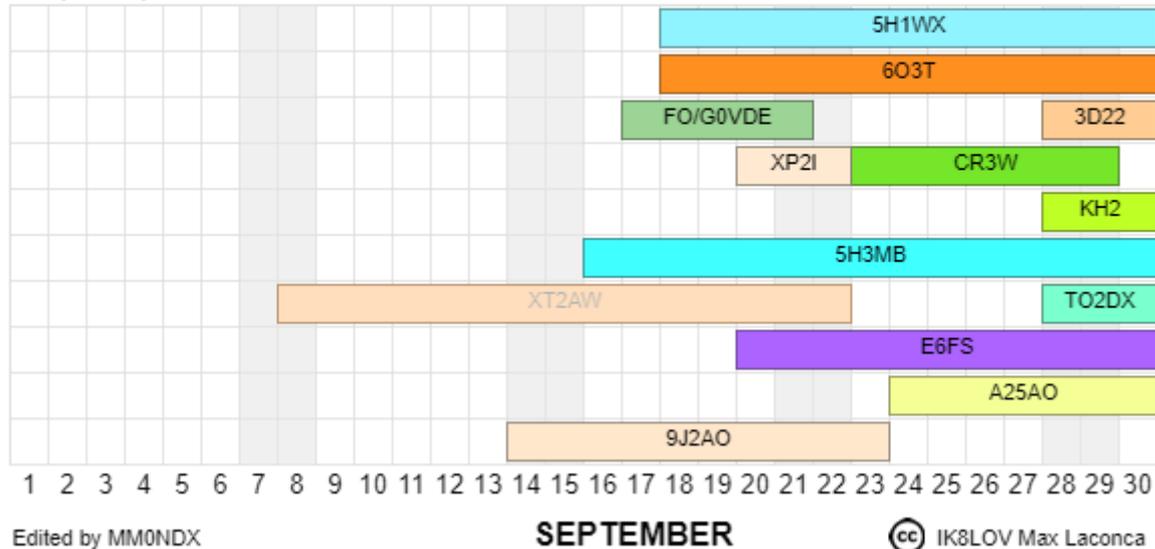

Funding raising efforts continue for the November DXpedition. Please consider supporting the 3D2Z Rotuma DXpedition by visiting our website for details: rotuma2024.com

AS-140 Dal Char Isl We are planning to activate another IOTA in this December 13-19. Our main goal this year is to focus on hands on training and capacity building for the local HAMS to understand different types of HF antenna, Propagation and Pileup handling. We hope in coming days we will see more HF station doing DXing from S2.

After checking all the islands in the two groups, considering Logistics, Transport and Cost we have decided to do the IOTA from the same island as before (Dhal Char, AS-140). The other nearby island is not suitable due to antenna orientation problem and also drinking water is not available in

all of them, some are not inhabited.'
