V55LA Namibia –update October 31

V55LA team has arrived in Namibia and is currently going through the customs process. Next step is a 6 hours drive up north to the QTH!

AU2K Kanika Island AS-179 –update by Cezar VE3LYC

Cezar (VE3LYC) purchased his return plane ticket, and he will arrive in India on Nov 26. This will allow our team sufficient time to double check that everything needed for this project is tested and functions as intended.

Following Frank's departure, the project is financed by Cezar. Our team worked on adjusting the

budget to current conditions, and found ways to reduce some costs, but the overall reduction is relatively small. Apart from Frank's travel, this includes purchasing a less expensive type of new generators, and using tents locally available. Worth noting, we decided to leave in place all the contingencies already incorporated, including emergency evacuation by high speed boat.

ZL7IO Chatham Islands –update by Holger ZL3IO October 30

This is my last day. My flight, planned for the early morning , is now delayed to the afternoon. I won't make it home tomorrow and will stay in Wellington overnight. Luckily our daughter Saskia lives there and I have a bed for the night plus a few hours with my grand-daughter.

Some of you may get lucky as well. I will be around for my sunrise on 160m. While talking about 160m...So many asked for 160 and now that I'm active no one is there. My window is very small. I worked 70 stations last night. In Nov, the greylines between EU and ZL7 wont match anymore and contacts will be more difficult.

C21MM –now QRT

Another excellent DXpedition by this super group has come to an end. They made just over 95K QSOs. Thanks a lot guys for flying the flag!

VP5/WQ7X TURKS & CAICOS –cancelled by Marc WQ7X

'I'm very sad to let everybody know that this time I will not be able to operate from VP5 due to a serious medical condition that has developed on the way to Miami, FL. I'm currently in the hospital. My VP5/WQ7X license is valid for one year, so still hoping to operate from Turks and Caicos in few months' time. I'm very sorry that my family vacation was ruined also.'

Rebel DX Group: Bouvet update

The Rebel DX Group announce they have received a helicopter landing permit (from Norwegian Polar Institute) for Bouvet Island. They say this permit is a back-up plan for their preferred zodiac landing. More info to follow in due course. <https://www.facebook.com/rebeldxgroup>

3D2Y Rotuma DXpedition –update

As a thanks to the stations who have helped us to attain our QSO goals we are announcing the 3D2Y Club Log Leaderboard Challenge. The objective is simple. Work us on as many band slots as possible!

We will be awarding a personalized bound photo album to the top 5 stations on the leaderboard on each of the five continents: North America, South America, Europe, Asia and Oceania. Positions 6 through 50 on each continent will receive a certificate signed by the team.

We are hopeful that the challenge will add additional excitement and incentive to work the 3D2Y team. To be eligible, a station must make an early donor donation, or request a card through OQRS. We are still working hard to reach our funding-raising goals for the November DXpedition.

VK9CV Cocos Keeling Isl –update

The team just completed a 10-hour flight from Istanbul to Kuala Lumpur. Now they have a 2-hour wait for the next five hour flight to Perth, Australia.

Being on my own, it will remain to be seen if I manage to setup any 80m and 160m before I have to leave the second week of November. I am also involved in work related to Surface Seawater Temperature (SST) monitoring of the coastal waters off Rotuma, and some SCUBA diving will need to take place.

Concerning operating, I am focusing mainly on SSB and CW, with some digimodes when there are no takers elsewhere (single stream on normal operating frequencies, or multistream on DX frequencies (28090, for instance). Usually all digimodes are using solar power and about 30W output into the Spiderbeam. For SSB and CW, I have one ACOM 600S linear.'
