21/11/2024

By ON9CFG

ON9CFG@telenet.be

This coming weekend (November 23-24) sees one of the biggest DX contests of the year – CQWW CW. Even if you're not a contester, there's usually something "juicy" to work on the bands, especially now sunspots and solar flux are much higher than previous years.

Keep an eye on **ADXO** for the most up to date listings of DX stations taking part, particularly a day or two before.

Meanwhile, here's the **rules**. Also remember this year – **after a policy change** – Russia / Belarus stations are permitted to operate as normal.

DX NEWS

3B8M Mauritius –update by Olof, G0CKV

'A depression developed into a tropical storm, was named Bheki, continued to build into a violent cyclone and has been aiming for us ever since. As of Tuesday evening there's a cyclone warning class I in force for 3B8. As a precaution, we have taken down our antennas, secured the house with shutters, and secured outdoor furniture. We have also ensured that we have food supplies and emergency water to hunker down for a couple of days. Our QTH is very exposed to the wrath of the Indian Ocean. We are right in the water on an exposed low tiny islet. With a strong violent cyclone we would need to evacuate. With a less violent cyclone we will lock down here but our road to land would be dangerous.' <https://www.dx-world.net/3b8m-mauritius/>

9L5A Sierra Leone –update

To benefit from a fast LoTW confirmation it has become more and more common to have to pay or, otherwise, to wait 6 months (or even more). F6KOP does not support this practice. 9L5A log will be on LoTW as soon as we return from the expedition (subject to a short delay for the usual corrections). LoTW will therefore be free and immediate for everyone. However if you want to help us, everyone is free to make a donation but without any obligation.

FW7AA Wallis & Futuna –update November 18

Things are going relatively smooth at FW7AA. We have almost 4000 Q's in the log. We have (2) Elecraft K3 stations with KPA500 amps running, with DX Commander Signature 9 and Classic antennas. We're working on getting the 160 inverted L and beverage on the ground up. Both W7YAQ and I agree that band conditions have not been that good, especially to EU. Not nearly as good as our VK9LAA and A31DL trips. This morning at my local sunrise we could copy EU for the first time on 30M FT8 and had a good run.

3D2Y Rotuma –update November 20

'It is now 6 days since we arrived in Rotuma. We have ongoing challenges concerning electricity here in Rotuma. We have a number of power solutions, which we are implementing, however none of them are flawless and we ask for patience if we are off air or operating a reduced capacity. We are aware of band openings and when we need to be QRV for the different areas, we are bringing in additional resources at these times and so far we have seen an increase in our performance to these areas.

Since our arrival we have made great progress in getting most of the antennas up and have even made some QSOs on 6m, however we are still waiting for a tree climber to put a pulley in the tree for 80/160m antenna. We anticipate this happening before CQWW CW. The team is finding it challenging to complete antenna work during the day due to the extreme and oppressive temperatures. Over the last couple of days we documented in excess of 30°C and 88% Humidity causing the temperature to feel much higher.'

VP8G Falkland Islands –update November 20

[UPDATE @ 2000z] – Again QRV:

Late afternoon it became sunny and the storm slowed down. It took me 45 minutes to fix both antennas. Ready for the VP8G pile-ups again. Thanks for your patience.

[NOVEMBER 20 @ 1300z]

20 and 17m wires got away from a spreader arm. Need to take the antenna down to repair, but in this storm too risky that the antenna mast will break. Will be QRX for 6 hours and will try to repair both antennas late afternoon. Weather yesterday and today is worst of my stay here till now, rest is all OK. Internet is limited, using expensive prepaid cards for connection every day.

FY/WE9G French Guiana –update

'For this FY DXPedition, I'm offering an expedited (and free) QSL card for those with a clean sweep. Catch me on 10, 12, 15, 17, 20, 30, 40, 60 & 80 meters, all being logged and confirmed with me in QRZ, LoTW or Club Log for this gift. If you also catch me on 6 meters, I will send YOU a dollar! Just email me post trip to be the first to get a QSL card.'

African Tour by HA5AO –update

'I am on holiday between 22 November and 12 December. During this period, I am unlikely to have internet access and I can not upload QSOs, especially the 9J2AO, Z22AO and A25AO QSOs to the LotW. I will upload the QSOs for the OQRS claims received in this period, as soon as possible. Thank you for your patience and understanding. The 9J2AO, Z22AO and A25AO full logs will be uploaded to the LotW in April 2025. The QSL cards are under design and I am going to post them as soon as I receive them from the print shop.'

5X1DF and 5X1XA Uganda –update

'Due to a family emergency, Don G3XTT (as 5X1DF) is having to cut short his trip to Uganda and will be returning to the UK on Thursday (21st). Obviously, he will not now be QRV for the CQWW CW contest. In the meantime, he should be active today for a little while before heading home.'

3D2AG/P Rotuma –update November 20

Antoine, 3D2AG says the boat for Fiji left Rotuma on Monday 18th at 0600 UTC, and he's now back at home. He had quite an ordeal the last week on Rotuma having contracted both a viral infection and a severe cellulitis of the leg which had him bedridden for three days, and unable to complete taking down antennas and pack his gear, at risk of missing the boat.

Luckily, Gregg W6IZT and Jamie M0SDV came by to visit Antoine on Sunday 17th, and helped with taking down the remaining antennas. The cellulitis, which could have proved life-threatening if left for a few more days, is now being aggressively treated, but still very painful and making walking and standing very difficult. While in convalescence, Antoine will digitize the Rotuma logs for posting online on at Club Log. <https://www.dx-world.net/3d2ag-p-rotuma/>

AU2K Kanika Island AS-179 –update

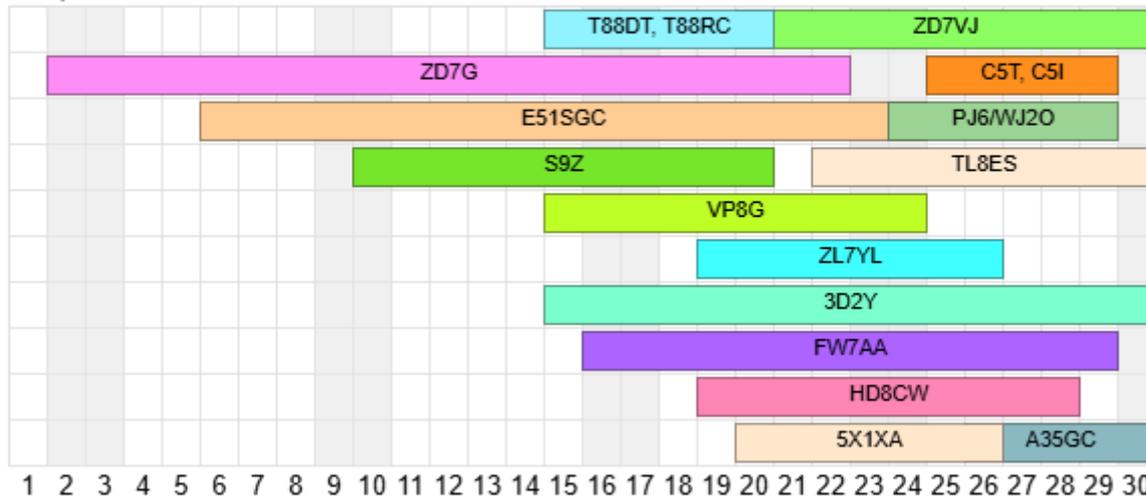

Cezar, VE3LYC will travel to the Toronto Airport by bus, in the afternoon of Nov 24, and overnight at one of the airport hotels. He will fly to India in the morning of Nov 25, first to New Delhi, then to the city of destination, where is scheduled to arrive in the evening of Nov 26 and meet with Sarath. The two will go over the list of components and logistical plans. Adersh and Anil will arrive a couple of days later, and together, the team will check all equipment and camping materials, making final purchases in Bhubaneswar, before heading out to Dhamara. Final logistical preparations will be carried out on Dec 1, and landing on Kanika Island is scheduled for the morning of Dec 2.

The team will operate from Kanika between Dec 2 and 7. After leaving Kanika, the team will pack all components that are not needed for Sagar, ship them to Guntur, and overnight in Dhamara. Next day the operators will travel to Kolkata, and then to Sagar Island AS-153. We decided that we will overnight on Dec 9 at one of the local hotels / guest houses, and depending on the level of electrical noise either continue from there or move to another island location. The operation from Sagar will end on Dec 13.

This time, we are focusing on VU4 from the Andaman and Nicobar Islands, currently ranked 54th most wanted DXCC country. During this DX expedition, we will be active on all bands, using CW, SSB and digital.

This provides a fantastic opportunity for radio amateurs around the world to work this DXCC and IOTA.

There will be more updates on our [website](#) – stay tuned for the latest news and details.'

ZD9, TRISTAN DA CUNHA DX-World has learned that a Tristan da Cunha DXpedition is in the works for 2025. Whilst it is quite some time away, we have gleaned the following info.

It will be a 3-4 month long DXpedition to ZD9 which could be extended by another 2-3 months bringing it to (potentially) 6+ months. The additional months could depend on PayPal donations / extra donors. Focus is going to be on CW & SSB. There will be VERY LIMITED usage of FT8.

Infact, FT8 will ONLY be used on 80 & 160 meters. Bands of operation will be 10 meters to 160 meters. 1kW to monoband heavy duty vertical antennas due to Tristan da Cunha's very inhospitable weather.

ZK3, TOKELAU Hrane YT1AD and team YU3AA, RC9O and UA9OYL will be active from Tokelau end 2024 or beginning 2025. The reason is that New Zealand's State activities on the island of Tokelau during February and March, which have PRIORITY!

IOTA

THE REMINDERS

ASIA

AS-140 Dal Char Isl 'We are planning to activate another IOTA in this December 13-19. Our main goal this year is to focus on hands on training and capacity building for the local HAMs to understand different types of HF antenna, Propagation and Pileup handling. We hope in coming days we will see more HF station doing DXing from S2.

After checking all the islands in the two groups, considering Logistics, Transport and Cost we have decided to do the IOTA from the same island as before (Dhal Char, AS-140). The other nearby island is not suitable due to antenna orientation problem and also drinking water is not available in all of them, some are not inhabited.'
