Kerguelen 2025 DXpedition / project by Thierry F6CUK

More and more friends are asking me for news of the Kerguelen expedition project. It has now been two years since I was active from Crozet. It is therefore necessary to take stock of the progress of the project.

During my stay in Crozet, I had established contacts, sometimes friendly, with many people working at TAAF. After having drawn up the file with the REF, I was quite confident and we sent it directly to TAAF. The TAAF personnel had noted that the station did not disturb the animals, particularly the birds, and that my presence among the base personnel had gone well. Despite this, as you know, we were refused, which was a surprise to me. We did not really understand the reasons for this refusal, but we had to deal with this situation.

TX9A Austral Islands –update

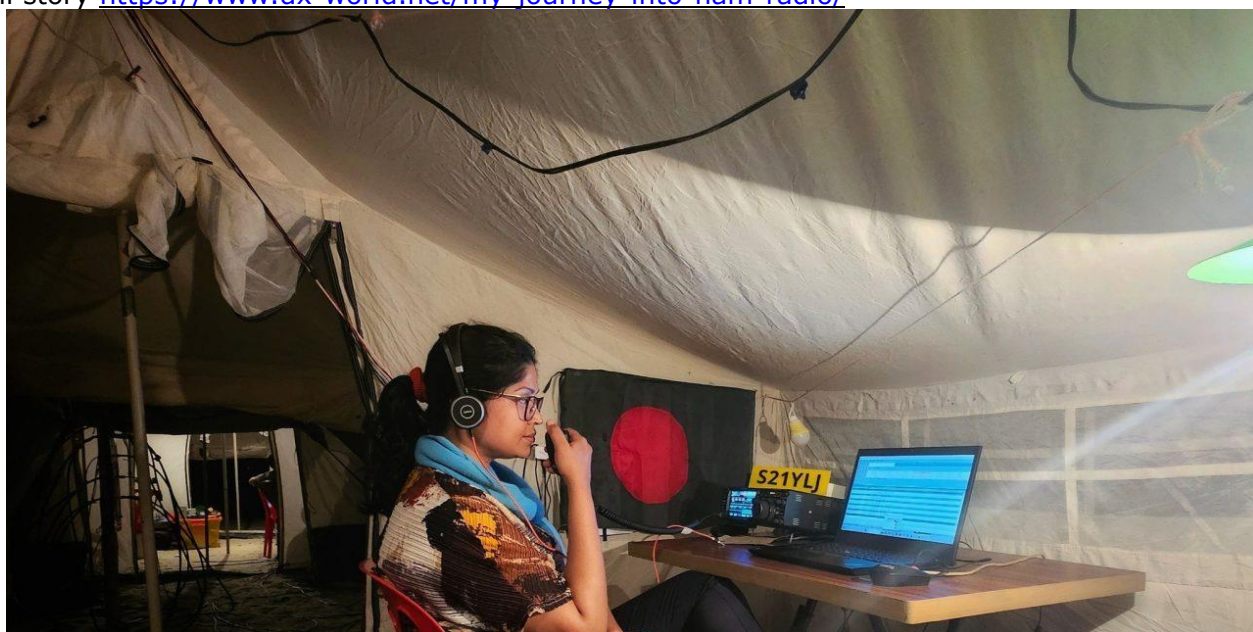

110 days until the start of our adventure! Some news from our team: we paid for an additional luggage (which is not cheap) from Paris to Papeete because we want to be sure that the equipment that is planned arrives with us in Papeete / Tubuai. We also want to thank **Koaxshop**, from whom we received a discount for the purchase of the Aircell 5 cable. Thanks, Andreas! Also, we are in final arrangements for the use of specific power amplifiers – more to come.

My journey into Ham Radio by Maria Raka S21YLJ

I didn't want to write about Amateur Radio until I felt smart enough to share my thoughts with others. But so many people kept asking me about it that I decided to share my experience rather than write formal or weighty lectures on the subject.

It all started 7-8 years ago when I truly felt the urge to become an operator like Rabby, S21RC. However, I didn't have the courage to express it to him, as I had disqualified myself in the first round of the process. Years passed. During that time, I handled radios, antennas, and other equipment – cleaning the dust, packing them, and sometimes helping set them up on the ground.

AS-161 Sacrifice Rock AU2V

After the resounding success of our previous activations at Nachugunta, Kanika, and Sagar, our team has set its sights on the elusive Sacrifice Rock, one of the most coveted IOTA locations among chasers. This ambitious project has been years in the making, and we're thrilled to finally share the news with the amateur radio community.

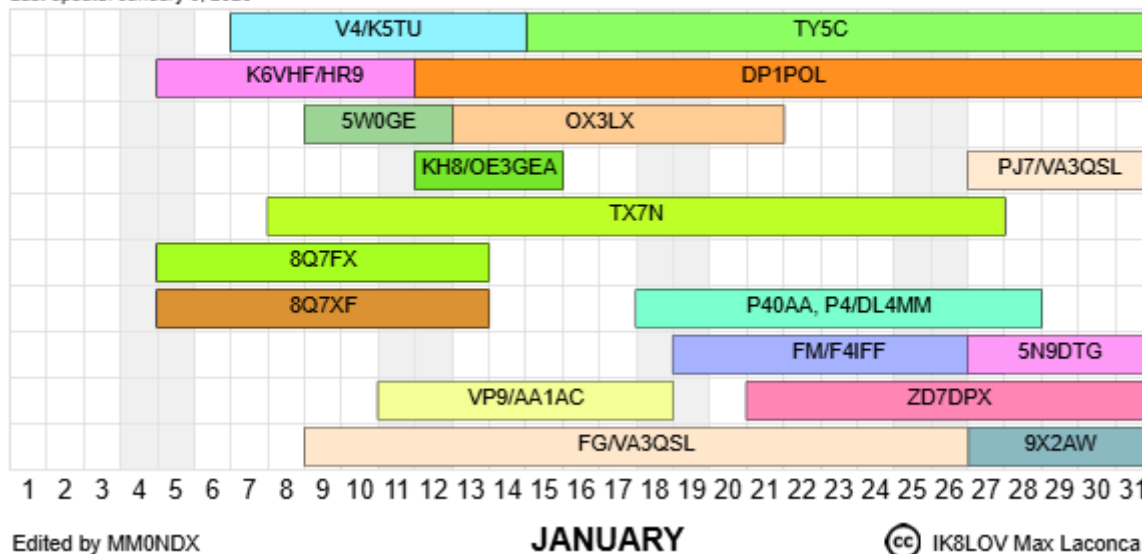

Sacrifice Rock, notorious for its challenging terrain, inhospitable environment, and exorbitant costs, has long been considered a "holy grail" of IOTA activations. Our team is determined to overcome these obstacles and bring this rare entity to the airwaves.

ZD9, TRISTAN DA CUNHA DX-World has learned that a Tristan da Cunha DXpedition is in the works for 2025. Whilst it is quite some time away, we have gleaned the following info.

It will be a 3-4 month long DXpedition to ZD9 which could be extended by another 2-3 months bringing it to (potentially) 6+ months. The additional months could depend on PayPal donations / extra donors. Focus is going to be on CW & SSB. There will be VERY LIMITED usage of FT8.

Infact, FT8 will ONLY be used on 80 & 160 meters. Bands of operation will be 10 meters to 160 meters. 1kW to monoband heavy duty vertical antennas due to Tristan da Cunha's very inhospitable weather.

ZK3, TOKELAU Hrane YT1AD and team YU3AA, RC9O and UA9OYL will be active from Tokelau beginning 2025. The reason is that New Zealand's State activities on the island of Tokelau during February and March, which have PRIORITY!
