3Y0K Bouvet Island –update

Today we have paid our first deposits for the helicopter and vessel contracts in total around \$450,000. Paying the deposit as part of the contract signing shows a major commitment from the team, and we will now start the detailed planning.

During the course of the next few weeks we will study and determine the station and antenna setup to be used at Bouvet. With our previous experience from the island and the local conditions we will make sure to adapt the setup and QTH to maximize the team effort. We will also look for synergies with the upcoming Peter I expedition as the intention is that the equipment we select for Bouvet to the extent possible also will be used at Peter I. Looking at synergies between the two expeditions will make it more efficient for both teams.

VK9XU Christmas Island / VK9CU Cocos Keeling –update

VK9XU: Our team has been working for the past months to prepare our upcoming DXpedition. All flights and accommodation are booked, most equipment and antennas available. We will leave Germany on February 16 to Christmas Island, via Bangkok and Perth. Arrival is scheduled for the afternoon of February 18 and we hope to set up at least one antenna and our shack that day. It will certainly keep us busy most of the next day to finalize all antennas and to start working three stations 24/7.

DXCC Trident award

Excerpt from an ARRL Member Bulletin sent out January 22, 2025:

The Programs & Services Committee and headquarters staff from the Radiosport Department are moving ahead with the creation of a new DXCC award — DXCC Trident — which will recognize those who achieve DXCC using CW, phone and digital modes. Higher achievement endorsements can be earned at the 200, 300, and Honor Roll levels. The DXCC Trident award is intended to spur greater on-air operating and to inspire those using digital modes to also develop their skills in, and practice, CW and SSB.

International WSPR beacon project: ZS8A Marion Island

"We are in the planning phase of a new permanent multiband WSPR receiver on Marion Island – Callsign ZS8A using an Airspy HF+ Discovery – scheduled deployment in April 2025."

HD8G Galapagos Islands –update

We proudly confirm a robust international DXpedition to Galapagos Islands in 2025. HD8G will be on the air from April 18th to April 26th. There will be 22 ham ops from Ecuador, Brazil, India, Serbia and Russia managing 8 stations in two sites at Santa Cruz island with 1 station dedicated to satellites, 1 station dedicated to EME and 1 station dedicated to 6m. Our official advisors are NE8Z – Rick and OK1BOA – Petr. This project was launched 1 year ago.

Ham radio associations and companies are invited to visit our HD8G website and if you may contribute with any donation or material support to this team to perform a great DXpedition, we thank you in advance for making it come true.

V37WW Marshall Islands DXpedition –update

We are thrilled to announce that our upcoming DXpedition to the Marshall Islands has been assigned the callsign V73WW. Our team will begin operations on 12th February 2025 for approximately 12 days, though times may vary based on local conditions. Stay tuned to [Facebook](#) and [X](#) for the latest updates and frequency information.

QSL Service and Sponsorship Opportunity

We are offering a special sponsorship opportunity for radio amateurs to support our DXpedition!

With a donation of €20 / \$20 or more before the first QSO, you will receive free direct QSL service for your callsign.

QSL cards will be managed by DJ4MX, and we will use Club Log OQRS, with a direct QSL option available after the DXpedition. Free OQRS Buro will be available later.

Our international team, consisting of more than 10 experienced operators, is eager to embark on this adventure.....'*

This time, we are focusing on VU4 from the Andaman and Nicobar Islands, currently ranked 54th most wanted DXCC country. During this DX expedition, we will be active on all bands, using CW, SSB and digital.

This provides a fantastic opportunity for radio amateurs around the world to work this DXCC and IOTA.

There will be more updates on our [website](#) – stay tuned for the latest news and details.'

YS, EL SALVADOR Dave, WJ2O will be operating as YS1/call between February 12 and February 19, 2025. Operation on HF using CW. The ARRL DX CW contest is included. QSL via N2ZN.

ZC4, CYPRUS SBA Adrian, G0KOM will once again be active as ZC4MK during March 24-31. An entry in the CQ WPX SSB contest is included.

ZD9, TRISTAN DA CUNHA DX-World has learned that a Tristan da Cunha DXpedition is in the works for 2025. Whilst it is quite some time away, we have gleaned the following info.

It will be a 3-4 month long DXpedition to ZD9 which could be extended by another 2-3 months bringing it to (potentially) 6+ months. The additional months could depend on PayPal donations / extra donors. Focus is going to be on CW & SSB. There will be VERY LIMITED usage of FT8.

Infact, FT8 will ONLY be used on 80 & 160 meters. Bands of operation will be 10 meters to 160 meters. 1kW to monoband heavy duty vertical antennas due to Tristan da Cunha's very inhospitable weather.

ZK3, TOKELAU A QSP from the Rebel DX Group ZK3ZK: on target for around mid-June.

'We will be doing some delivery on one of our vessels for Tokelau. For now Tokelau borders remain closed due to several local issues. More info soon.'

ZK3, TOKELAU Hrane YT1AD and team YU3AA, RC9O and UA9OYL will be active from Tokelau beginning 2025. The reason is that New Zealand's State activities on the island of Tokelau during February and March, which have PRIORITY!

ARCTIC NEWS

Antarctica DXpedition by Eric KB1EHE and Elsie KB1IFZ

Eric KB1EHE and Elsie KB1IFZ will be on an Antarctica DXpedition beginning 28 January and wrapping up 2 February. They will be operating 20m SSB and FT8.

They will be based on the National Geographic Explorer ship, and will trek various destinations along the Antarctic Peninsula. Due to recent avian bird flu (H5N1) concerns, and potential impact to wildlife and the fragile Antarctica ecosystem overall, visitors to Antarctica have to take significant precautions. For instance, to prevent the transmission of pathogens, the bottoms of boots and tips of hiking poles are disinfected prior to any excursion. Only boots and poles can touch the walking surface, complicating remote radio-station setup.

Eric and Elsie, in collaboration with their Connecticut-U.S.-based colleagues, have created an

entirely portable (nothing touching the ground) 20m station, comprised of a Xiegu G90, laptop, and battery power supply that's connected by a short piece of coax to a homebrew 5.6m / 18.4 ft. telescopic vertical antenna system with two substantially shortened counterpoise elements. The couple report to DX-World that they have extensively rehearsed "donning and doffing" their backpack-stowed gear and have had successful worldwide QSOs from their home QTH in Connecticut. They said they "feel like astronauts" suiting up each other in an airlock prior to a spacewalk! The couple said they analyzed the 20-watt output of the G90 and their portable configuration's SAR / RF exposure, and they are well within safe operating limits.
