DX news

SV1GA/A Mount Athos

Time flows differently in the Holy Community as even the morning prayer starts at 4 AM. We can all learn and benefit from the Mont Athos lifestyle.

Most importantly, the SV1GA/A team is safe and in good spirits and excited to have brought on the air such a rare DX entity.

The matter of Amateur Radio in Mt Athos is in the hands of different entities within the Holy Community and all we can do at this point is serve as source of knowledge and expertise. For us the key entity is the authority that issued our invitation/permit to carry out the SV1GA operation. Our paperwork is as clear as water but outside sources have put everything on hold for further review

We are not trying to speculate the variety of arguments or opinions but just provide information for the parties involved. The final word is expected soon as we wait for the relevant authorities to meet and review our case.

As we also have limits for waiting, we will make the decision about our own standing very soon.

Saint Peter & Saint Paul DXpedition by George AA7JV

The Araucaria DX Group is pleased to announce it has received permission from the Marinha do Brazil (Brazilian Navy) for a DXpedition to Arquipélago de São Pedro e São Paulo (Saint Peter & Saint Paul archipelago). The operation will take place in the October – November 2025 time frame. The actual dates will be announced later.

The St. Peter & St. Paul rocks are located at 0 deg 55.2' N and 29 deg 20.9' W, about 60 miles north of the Equator, approximately 600 miles from the city of Natal, on the Brazilian mainland.

AU2V Sacrifice Rock AS-161 –update

The Sacrifice Rock IOTA AS-161 expedition team is thrilled to announce that they have received the official callsign AU2V from the Wireless Planning and Coordination (WPC) authority, Government of India.

The team has set up a [website](#) to provide updates and information on the expedition. Donations to support the expedition can be made by Paypal at sarath@lven.in.

Despite receiving some generous donations and assurances of support from foundations, the team is still short of funds to purchase necessary equipment and accessories for the expedition. The team expresses its gratitude to the individuals and organizations that have contributed so far and looks forward to receiving the promised support after the expedition. <https://www.dx-world.net/au2v-sacrifice-rock-as-161/>

TX7N Marquesas Islands –now QRT

'We are nearing the end of our transmissions here in the Marquesas Islands. Despite the many challenges we faced, including difficult propagation conditions and warm weather, we are proud to announce that we have achieved over 40,000 QSOs! This success is thanks to your support and passion for radio. Every contact was a unique adventure and an unforgettable moment of connection. 73 from the entire TX7N team.'

C21TS Nauru –update by Phil FK1TS/C21TS

I had previously stated that I would finish in February 2025 in Nauru, but I have decided to stick it out a bit longer. Plans at this stage are to stay at least until September 2025 then take 2 months leave..after that?

The time here has been interesting and I have seen Nauru move from 54 on the most wanted to 106. That's mostly down to myself and of course [C21MM](#) in October last year (90K QSO).

Currently C21TS is at 83,000 QSO with minimal dupes as I do not use MSHV. I am hoping to leave here with 100K. My DXCC count is at 221 confirmed as I do some chasing as well as being chased.

P29XZ Papua New Guinea

'I finally bought a 3-meter lifting pole over the weekend. Now I have set the V-shaped antenna to a resonant length of 18.074Mhz (17 meter). Using the X6100 antenna tuning device, the standing wave can reach about 1.2, which is very ideal. As soon as I go online, I will be surrounded by radio stations from all over the world, which makes me very embarrassed. I can only try to

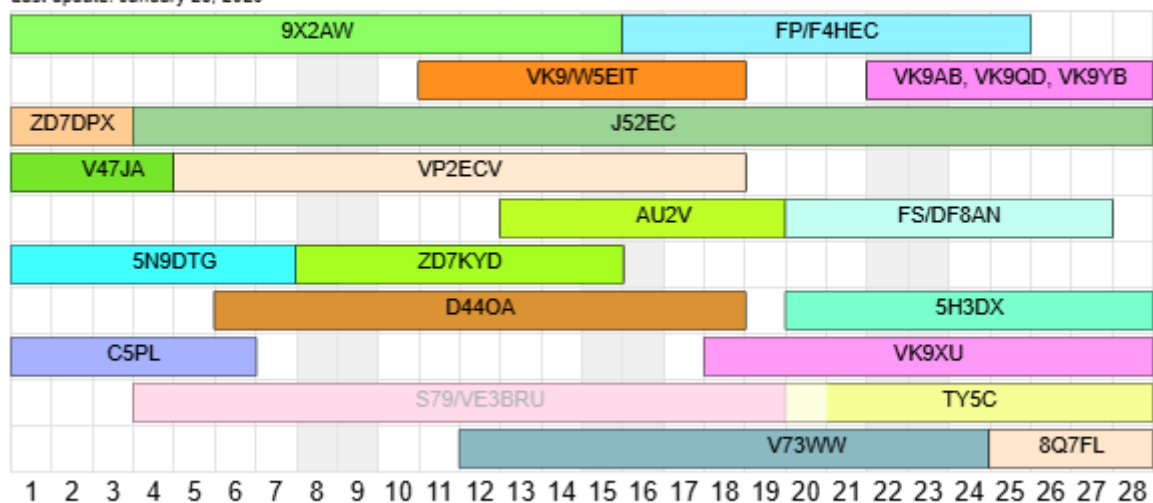

contact more radio stations. I will basically work on the 17-meter band before February 6. Then I will go back to China for a while, and I will come to Papua New Guinea again in mid-March. By then, my new 4-band antenna will arrive, and I may bring my FT-897 radio with me, so that I can contact more radio stations.'

YJ, VANUATU Bob, ZL1RS (last year as E51EME) will be active from Efate, Vanuatu as YJ0RS in June '25. More details to follow, however focus on 6m and possibly 10m (if 6 is "dead"). QSL via LoTW and paper QSL cards will also be available via ZL1RS.

ZC4, CYPRUS SBA Adrian, G0KOM will once again be active as ZC4MK during March 24-31. An entry in the CQ WPX SSB contest is included.

ZD9, TRISTAN DA CUNHA DX-World has learned that a Tristan da Cunha DXpedition is in the works for 2025. Whilst it is quite some time away, we have gleaned the following info. It will be a 3-4 month long DXpedition to ZD9 which could be extended by another 2-3 months bringing it to (potentially) 6+ months. The additional months could depend on PayPal donations / extra donors. Focus is going to be on CW & SSB. There will be VERY LIMITED usage of FT8. Infact, FT8 will ONLY be used on 80 & 160 meters. Bands of operation will be 10 meters to 160 meters. 1kW to monoband heavy duty vertical antennas due to Tristan da Cunha's very inhospitable weather.

ZK3, TOKELAU A QSP from the Rebel DX Group ZK3ZK: on target for around mid-June.

'We will be doing a delivery on one of our vessels for Tokelau. For now Tokelau borders remain closed due to several local issues. More info soon.'

ZK3, TOKELAU Hrane YT1AD and team YU3AA, RC9O and UA9OYL will be active from Tokelau beginning 2025. The reason is that New Zealand's State activities on the island of Tokelau during February and March, which have PRIORITY!

On the scene...Allen KH7AL/KH9 Wake Island

"I am looking forward to building and operating my new DX Commander Expedition vertical from Wake Island."

THE REMINDERS

ASIA

AS-161 Sacrifice Rock A team (previous AU2S) will try to activate this 'holy grail' before March, the goal is mid-February. Operation as AU2V. The team consists of experienced amateur radio operators, including Sara (VU2RS), Adersh (VU3WEW), Anil (VU3DXA), Sangeeth (VU2TT), Grisih (VU3GDS), and Renju (VU3TPW). The expedition's QSL Manager is Charles, M0OXO.

NORTH AMERICA

NA-079 Dry Tortugas The N4T team will be operating between February 21 and February 25, 2025. Main goal is 6 meter operation from the rare grid EL84 and from various POTA parks. QSL via W3NY.

NA-190 Isla Zacatillo Renato PY8WW will be active as YS3PY together with PY7RP, PY7XC and PY1WK. Operation between May 7 and May 17 from 80 to 6 meter. Renato mentions: *"as they activate this rare island, combining the thrill of amateur radio with exploration"*

NA-220 Maniitsoq Isl Joe, OZ0J will once again be QRV as OX0J sometime September 2025. Activity from 40 to 10 meter depending on free space for antennas. QSL via Club Log OQRS (prefer), LoTW or H/C. Joe will try to participate in the SAC CW on ONE band only if condx are good, and will also operate on CW, SSB and FT8 (mostly Fox/Hound) before SAC CW. Depends on local weather, he will put up the antennas on 13 September and take down on 22 September. Club Log Live Stream will be added if the Internet connection is stable. Information will be updated continuously **here** (and DX-World).

OCEANIA

OC-059 Kosrae Rikk, WE9G will be operating as V6WG during March 18 and April 1, 2025. QRV from 80 to 6 meter (160 might be possible) using mainly FT4/8 with some CW and SSB. QSL via Club Log.

OC-067 Bora Bora Nobby, G0VJG will be QRV during June 11-27 as FO/call. Operation on HF and 6 meter using high power.

OC-235 Camiguin Isl Kouichi, JI1FGX/DU9 is planning an IOTA DXpedition during next April-June when conditions on 50Mhz are more favourable. This will apparently be the first 6m activation from the island. He will use a HexBeam covering: 14, 18, 21, 24, 28, and 50MHz with the main mode being FT8. ARCTIC NEWS

Antarctica DXpedition by Eric KB1EHE and Elsie KB1IFZ

Eric KB1EHE and Elsie KB1IFZ will be on an Antarctica DXpedition beginning 28 January and wrapping up 2 February. They will be operating 20m SSB and FT8.

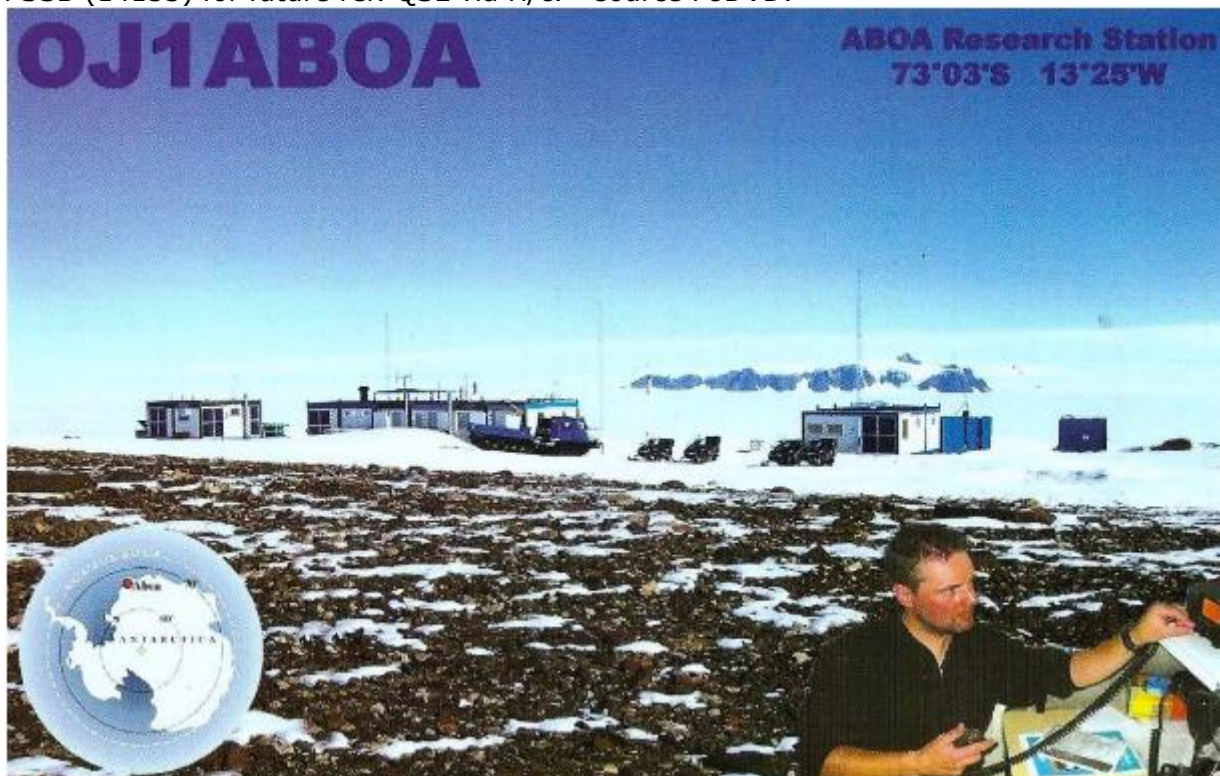

They will be based on the National Geographic Explorer ship, and will trek various destinations along the Antarctic Peninsula. Due to recent avian bird flu (H5N1) concerns, and potential impact to wildlife and the fragile Antarctica ecosystem overall, visitors to Antarctica have to take significant precautions. For instance, to prevent the transmission of pathogens, the bottoms of boots and tips of hiking poles are disinfected prior to any excursion. Only boots and poles can touch the walking surface, complicating remote radio-station setup.

Eric and Elsie, in collaboration with their Connecticut-U.S.-based colleagues, have created an entirely portable (nothing touching the ground) 20m station, comprised of a Xiegu G90, laptop, and battery power supply that's connected by a short piece of coax to a homebrew 5.6m / 18.4 ft. telescopic vertical antenna system with two substantially shortened counterpoise elements. The couple report to DX-World that they have extensively rehearsed "donning and doffing" their backpack-stowed gear and have had successful worldwide QSOs from their home QTH in Connecticut. They said they "feel like astronauts" suiting up each other in an airlock prior to a spacewalk! The couple said they analyzed the 20-watt output of the G90 and their portable configuration's SAR / RF exposure, and they are well within safe operating limits.
